

## *7 Step No Lose Problem Solving Homework*

You will have three weeks to complete this assignment.

Over the next two weeks use Dr. Thomas Gordon's 7 step No-Lose Problem solving technique to solve a problem in your home or classroom. One week after resolving the problem, reevaluate the situation and make any necessary modifications.

You are to type your write up using the script style and you must clearly use and identify all seven steps. You must include both quotes of what each person said as well as descriptions of any actions taken by the parties involved. I must be able to hear and visualize the scene as it unfolds.
